

EVENT AND STADIUM SUPPLIERS

GUIDE 2023

WWW.ESSG.ORG

Dear readers,

Thanks for spending some time to have a look in our 2023 ESSG Guide.

I can confirm now that the stadium business is growing every single day. Lots of new projects are coming our way.

Challenges are still there, smaller budgets are common these days, but our group of experts can provide the best solutions and still stay within budget.

I can say that ESSG is known as one of the best stadium and arena networking platforms, with a lot of proven records of his industry partners all over the world.

ESSG stands for Event & Stadium Suppliers Group and was formed in 2009. ESSG brings suppliers and stadium managers together in order to help successfully deliver their projects, whether it is new build, refurbishments, renovations or one day events. ESSG provides you the best possible information, advice and solutions you need.

During my 29 year of experience in the Stadium and Arena Industry I had and still have contact with a lot of people in the industry. With this Guide I want to create an information tool on supplying companies and consultants in the large venue business.

This Guide can help Stadium Managers, Clubs, Architects, Constructors to find the right information on the supplies or services they need for their venue or project. These companies were selected on quality, competence, service, reliability and proven records in the industry all over the world.

I hope that you find this ESSG Guide useful for your purposes, and for more information I am always happy to help.

Best regards,

Paul Anderson

 boschbuildingtechnologies.com

Company activity

Bosch with its brands Electro-Voice, Dynacord and RTS is a global supplier and market leader for integrated security, safety, and communications systems.

About Bosch Communications Systems

We offer complete systems for any venue, with over 1000 stadiums worldwide relying on our technology. Our extensive portfolio gives you background and foreground music options to suit every space and every budget – always with best- in-class sound quality and reliability. Our modern sound reinforcement and intercom solutions are based upon multi-functional, multi-domain integration and networking concepts. From the parking lots to the VIP suites, from the control rooms, concourses to the front-of-house system, professional sound and communication is delivered with maximum intelligibility and clarity.

The ideals of Electro-Voice, Dynacord and RTS are to provide solutions for small, medium, and large system applications. Our product portfolios include fully IP-compatible solutions based on Bosch's OMNEO media networking architecture which supports open standards and protocols such as Dante audio, OCA, ST 2110 and AES67/70. OMNEO is future-proof thanks to its extensive range of features and functions, and provides the highest levels of system reliability and redundancy.

Our team of experienced application engineers around the world is ready to support our clients in the selection, design, and implementation of our products in their sports venue projects. These solutions are based upon extensive experience, while helping to ensure an optimal total cost of ownership and utilizing our environmentally friendly product portfolio.

MTS SERIES
HIGH-OUTPUT POINT-SOURCE LOUDSPEAKERS

Electro-Voice

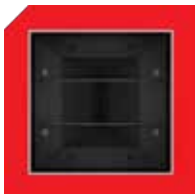

THE NEXT STADIUM STANDARD

UP TO
155 dB
PEAK SPL

MARKET-LEADING OUTPUT WITH EXACT COVERAGE

The MTS series consists of four base models. These include two standard three-way configurations with 60° x 40° or 40° x 30° coverage, and two cardioid configurations that provide the same coverage patterns with enhanced low-frequency directional control. The 60° x 40° models can deliver extremely high SPL: 151 dB peak (music) down to 55 Hz at -10 dB and 154 dB peak (speech); the 40° x 30° models are capable of 152 dB peak (music) down to 50 Hz at -10 dB and 155 dB peak (speech).

THE NEW STANDARD IN POINT-SOURCE SOUND

Each MTS standard model is equipped with four 15" woofers and dual coaxial mid/high frequency compression drivers. The four slot-loaded, high-efficiency low-frequency drivers are symmetrically coupled to the same full-range waveguide as the compression drivers to create a true point-source with substantial bass response, eliminating the need for additional subwoofers in many applications. Stunning acoustic performance for indoor and outdoor installations of all sizes.

UNIQUE CARDIOID MODELS

The MTS series offers another key differentiator from the current competition. Equipped with two additional woofers, cardioid models deliver full-bandwidth directivity control that reduces sound spill outside the pattern, enhancing dynamics, improving sound quality and clarifying speech intelligibility.

At Covermaster we create only the finest in protection and versatility possible for your most important asset, your sports playing surface.

About Covermaster

When it comes to any kind of sports surfaces, Covermaster Inc. is proud to be the first choice for protection. Ice arenas, outdoor sports pitches, gymnasiums, stadiums, tennis courts and even golf courses... for almost 50 years, Covermaster has been leading the industry with cover solutions that both protect and increase the versatility of recreational venues worldwide.

Covermaster's products can convert sports centers into revenue-generating, multi-purpose facilities. Athletic pitches and golf courses can be spared damage caused by adverse weather conditions, and our unparalleled range of gym floor covers are safe, slip-resistant and durable. While other companies offer surface protection as a sideline business, we make it our specialty.

We provide innovative products made from the highest quality materials and unmatched customer service. That's what makes our lineup the preferred choice among discriminating groundskeepers and groundsmen around the world. In fact, 90% of American National Football League teams, 90% of Major League Baseball and 75% of Major League Soccer teams are using one or more of Covermaster's surface covers on their pitches.

Whether it's turf, ice, dirt or a new gymnasium floor, Covermaster solutions are your best choice for premium, cost-effective protection and long service life.

Specialists in the design, manufacture, and installation of stadium seats and metallic bleachers for sports venues. With references in the 5 continents and more than 40 years of experience, our mission is to give life to our client's projects delivering comfortable, safe and attractive venues.

About Daplast

The needs of each client and project determine the best technical solution, which we integrate and develop in the following phases:

// Analysis: Experts in proposing the best solutions for public accommodation at sports facilities in a safe and comfortable way.

// Industrial Design: Development of multiple solutions in seats and bleachers. Wide catalogue of products that fully meet the seating capacity needs of each project.

// Own Factory: Control of the manufacturing processes (both plastic injection and metal confection). Own production plant in Spain with a large manufacturing capacity within the most challenging deadlines. All products are manufactured according to European standards.

// Installation: Turnkey supply and installation. Own experienced staff that travel to any part of the world to manage the installation process of stadium seating or metallic bleachers, according to our client events calendar.

Our control of all the processes allow us to guarantee the best results and total client satisfaction, maintaining high response capacity and flexibility.

Hybrid grass system specialist.

About GrassMax Systems

GrassMax Systems is a Swiss/Belgian based company that has found itself an important position in the hybrid grass market in no time. Since its inauguration project at Leicester City fc new training grounds – in January 2020- the company has become the undisputed market leader worldwide in stitched hybrid grass systems.

State of the art machinery, highly trained staff and a choice of different synthetic fibers to match the exact purpose of reinforcement for the club, stadium or federation, are all contributing to a modern and highly performant hybrid grass system. Some of the world's most renowned professional sports organisations worldwide are using the services and system of the company.

Hybrid grass is no longer a niche product for the happy few. It has become the standard for every modern professional football, rugby or American football organization. GrassMax System is working closely together with the industries stakeholders, organisations and pitch construction & designing companies.

The state of the art Lusail stadium -Doha Qatar- is one of the highlights at the impressive reference list. The stadium will be used for the World Cup Soccer 2022 in Qatar and will host, amongst a series of other games, the final game on December 18th 2022.

Sports and large area lighting solutions.

About Musco

Since 1976, Musco has focused on the design and manufacture of sports floodlighting systems, from your local club's pitch to professional sports stadiums around the globe. Offering solutions for both permanent and temporary floodlighting needs, Musco has attained first-hand knowledge of lighting issues that affect participants, spectators, and television.

We help meet the unique requirements of floodlighting sports facilities, providing you with solutions to questions such as:

How much floodlight is enough? // How can installation, operation, and maintenance costs be minimised? // How can a floodlighted sports facility be a good neighbour?

Our system approach makes sports floodlighting:

Practical, affordable, and trouble-free // Simple to purchase, install, and operate // Simple to purchase, install, and operate.

Our team drives sports lighting advances:

To solve problems and make projects happen for customers // To increase product performance and raise industry standards // Built on practical experience in putting our systems on the line – for you, your project, and your community.

Thousands of schools, cities, and facility owners have counted on Musco as part of their team, while providing the most value for their sports floodlighting budget.

About Nexo

NEXO has been designing ground-breaking sound reinforcement solutions at its French headquarters since 1979. The company's pioneering technology, innovative designs and sonic excellence have enhanced live events and venue sound across the globe for decades, gaining the respect and trust of sound professionals everywhere.

Today, NEXO is a wholly-owned strategic business unit of Yamaha Corporation, a convergence of technological expertise that has resulted in the advanced integration of speaker and amplifier control, and console management of sound systems over the latest and most popular digital networking protocols.

Through the application of convergence-inspired design, NEXO seeks not only to enhance the audience experience through the development of increasingly more transparent and consistently controllable sound systems, but also to serve the wider public through the improved directivity of its systems.

NEXO systems conform to all the latest quality certifications including ISO9001, TÜV certification, IP54 rating and the EC Declaration of conformity, and versions of the GEO S12 cabinets are certified as complying with EN54 standards for voice alarm systems. Along with our global partners, NEXO provides the highest levels of technical and system support, at the design stage, during installation and after system deployment. Cabinets can be specified in RAL colours to match stadium steelwork.

www.pitchtec.com

Company activity

Pitch technology consulting company.

About PitchTecConcept

PitchTecConcept is your bridge to the pitch technology market

There are many pitch consulting companies who have the right know how and experience to set out the exact profile of pitch that you need. With the specific technologies for drainage, under soil heating, irrigation systems etc.

There are also a series of highly professional companies that can construct your pitch based upon the specs given by those pitch consultants.

All of them have a vast experience in assisting you in pitch management and maintenance.

And as a customer you often wonder... is it worth while spending so much money on a football or rugby pitch?

Who can tell you what you exactly need in terms of pitch technology in order to not only give you best value for money but even start thinking on making money from your pitch instead of spending money on it?

This is the area where there are very few actors that can help you in finding the right answers.

PitchTecConcept is bridging that gap.

RAW STADIA

 Jan Stryckers (CEO)
 info@rawstadia.com
 11 Merus Court - Meridian business park - Leicester - LE19 1RJ - UK
 www.rawstadia.com

Company activity

Raw Stadia is a sports technology company focused on surface-player interactions.

About Raw Stadia

Our groundbreaking SaaS Pitch/Surface Analytics platform and closed loop data gathering hardware have been designed to correlate sports surface data (such as the firmness and elasticity of the soil, the shock the players will experience when running, the force needed for studs to penetrate for grip, and the rotational traction the athletes will experience when turning) to player data (such as GPS performance metrics, biomechanical and medical data). By using the Raw Stadia platform and surface testing tech, our customers improve their knowledge of the playing surface and gain insights into how the pitch conditions, which change daily, influence their players and athletes. Raw Stadia provides clubs, franchise owners, leagues, federations, and communities the ability to take preventative actions by testing their surfaces and analysing the data prior to matches and training sessions.

The “Surface Effect” completes the athlete dataset, providing a holistic view of all the factors influencing the player, when striving for performance optimisation, injury risk mitigation, and accelerated injury recovery.

Today Raw Stadia enables several elite football clubs in the major leagues and national teams in Europe to measure and apply data on surface-player interactions.

Terraplas are the World's No.1 for Turf Protection. A full range of products developed since 1991 and proven to outlast all other manufacturers'.

About Terraplas

No matter what event or where it is hosted, Terraplas products are universally acknowledged as the only solution for successfully protecting your quality grass from hordes of people, stages & heavy equipment.

Terraplas is to Turf Protection what Hoover is to vacuum cleaners and Kleenex to paper tissues -with good reason! There is no compromise on quality or performance –with Terraplas you KNOW you have the Best! Terraplas systems last over 25 years –no other product can match that proven longevity.

After thorough due diligence and intensive testing, almost all of the multi-use stadiums around the world have selected Terraplas products above every other manufacturers' offerings.

Wembley Stadium, England; Principality Stadium, Wales; Stade de France, France; FNB Stadium, South Africa; ANZ Stadium, Australia; SA Standard Liege, Belgium; Parken Stadium, Denmark; NSC Olimpiyskiy, Ukraine; Tokyo Stadium, Japan; Estadio Nacional, Chile; River Plate Stadium, Argentina; Luzhniki Stadium, Russia; Setsoto National Stadium, Lesotho; Cairo National Stadium, Egypt; Independence Stadium, Namibia; Commonwealth Games Stadium, Malaysia; Dubai Sports City; Hong Kong Stadium ... All of these high profile venues have chosen wisely. Virtually every Terraplas system sold since it pioneered the concept of turf protection 30+ years ago, is still in use today!

Company activity

The Parker Company is the industry leader in global hospitality, sports and events procurement and planning services.

About The Parker Company

Since it was founded in 1969, The Parker Company has worked with every major hotel chain and some of the world's most iconic sports teams and stadiums. The experts in our Sports & Events Division have nearly 40 years of experience, planning and managing the development of over 400 sports venues worldwide for major sports leagues and events.

The Parker Company understands that major event and facility development is dependent upon the ability of the client to plan, budget, order, ship and install tens of thousands of specialized furniture, fixtures, equipment and operating supplies. Our Sports & Events Division provides comprehensive procurement services developed specifically for these ventures:

- // Planning, budgeting and procurement of Furniture, Fixtures and Equipment (FF & E)
- // Planning, budgeting and procurement of Operating Supplies and Equipment (OS & E)
- // Procurement management: validation of suppliers, tendering, contract award, expediting, payment processing, shipping and installation on site.

The Parker Company offers an unparalleled level of service and industry expertise, utilizing a proven methodology that combines global sourcing, significant buying power, experienced staff and state-of-the-art systems. The Parker Company provides peace-of-mind project procurement and significant cost savings to its customers.

THE BIGELOW COMPANIES, INC. is a consulting firm specializing in the design and operational management consulting of catering and merchandise services at stadiums, arenas and convention centers.

About the Bigelow companies

THE BIGELOW COMPANIES, INC. is a consulting firm specializing in catering design and operational management consulting catering, concessions and merchandise services at stadiums, arenas and convention centers. The corporation has two major divisions; foodservice design and foodservice management consulting. While each division operates independently, both services complement one another. With over 70 years of combined experience, our company's expertise in efficient and profitable operations directs many of the design features of our equipment plans and facility layouts. Likewise, many operational challenges are often solved by proper placement and use of innovative new equipment and designs.

The Bigelow Companies, Inc. is the only independent consulting firm that has the ability to provide both the latest in computer aided design and drafting, 3D Building Information Modeling and the "hands on" experience in catering operational management and contract negotiations. Our growing list of repeat and new clients attests to our total dedication to the sports, entertainment and convention market.

Through the years The Bigelow Companies have worked closely with architects and drafters from many design firms on a variety of iconic sports projects and critical to the successful outcome of each project; we have developed a relationship with communication and resolution of challenges being quickly achieved. This provides each team member the ability to approach the project in a positive and professional manner.

Providing engineering consultancy and design for many leading sports and entertainment facilities, large scale planning & construction projects in the uk & overseas.

About Vanguardia

As the leading environmental and technology consultants, Vanguardia is partner of first choice for architects, developers, project managers and end users. We have contributed to the success of some of the most creative and iconic arena and stadium projects in the UK and overseas.

Whether it's a world class sport and entertainment venue, a major development or noise management for live events Vanguardia's reputation is for delivering projects of quality and distinction.

As design practitioners, strategic thinkers and problem solvers, we continue to be at the forefront of environmental noise and vibration, air quality, building and architectural acoustics, sound system design and audio visual design. Our ability to create the appropriate blend of functionality, value and vision makes us truly unique.

Our list of successful projects stand testament to our achievements and include UK stadiums notably Tottenham Hotspur Stadium, Wembley Stadium, Olympic Stadium and a number of home grounds for Premier League football and rugby clubs. Our overseas projects include Qatar 2022 football world cup venues.

Our experience also extends to renowned music venues including London O2 Arena, Lyric Theatre, Glasgow Hydro and the Coca-Cola Arena, Dubai. We strive to continually set new standards and work closely with our clients to help them exceed expectations in the delivery of unique projects.

COVERMASTER® EVERGREEN® COVERS

#1 IN PITCH COVERS FOR OVER 35 YEARS

EVERGREEN® FROST COVER

NOT COVERED

COVERED

ALL IN ONE FROST COVER & GERMINATION BLANKET

EVERGREEN® FROST COVERS & GERMINATION BLANKETS provide a greenhouse effect, allowing your turf to breathe and retain the right amount of heat and moisture, while also protecting against frost. The result is faster germination of newly seeded areas and deeper root development. It comes with our exclusive **SMART EDGE TECHNOLOGY™**, which allows you to customize size and shape any time, onsite as needed. Uniquely woven to be permeable and made of translucent polyethylene with a patented lace coating.

- Available in 4 Different Color Models
- Protect Turf from Frost Damage
- Quicker Seed Germination
- Can be Used With Grow Lights
- Lower Turf Maintenance Costs
- Large, Easy to Handle Cover Sections

TARPMATE AIR™ ROLLERS

Install or remove Evergreen® Covers in minutes. It only takes two people to roll and unroll a 30m (100ft) wide cover section, greatly reducing the time and effort required to handle turf blankets. Roller is easily inflated with standard backpack leaf blowers.
